[DOWNLOAD] Mining Heterogeneous Information Networks Principles. Aug 20, 2018 Abstract: Social networks often provide only a binary perspective on social ties: two individuals are either connected or not. While sometimes external information can be used to infer the strength of social ties, access to such information may be restricted or impractical. MLG 2018 14th International Workshop On Mining And

Artificial Neural Network Wikipedia

Artificial neural networks (ANN) or connectionist systems are computing systems inspired by the biological neural networks that constitute animal brains. The neural network itself is not an algorithm, but rather a framework for many different machine learning algorithms to work together and process complex data inputs. Such systems learn to perform tasks by considering examples, generally ...
